## W01-P1: create github repo -- 1112-2A-db-demo-id, git push w01 files

The image is a composite of four screenshots illustrating the steps to create a GitHub repository and push files.

**Top Left (VS Code):** Shows the file explorer with a project named "1112-2A-DB-DEMO-410411218". The file structure includes `bin`, `node_modules`, `public`, `routes`, `views`, `.gitignore`, `app.js`, `package-lock.json`, `package.json`, and `README.md`. The `.gitignore` file is highlighted with a red box. The terminal shows the output of `git init` and `git add` commands.

**Top Right (GitHub Web Interface):** Shows the repository page for "whitestorm2346 / 1112-2A-db-demo-410411218". The repository is private. The commit history shows two commits: "w01 first commit" (committed 1 minute ago) and "Initial commit" (committed 4 minutes ago).

**Bottom Left (VS Code):** Shows the file explorer with the same project structure. The `w01-p1.png` file is highlighted with a purple box. The terminal shows the output of `git add` and `git commit -m 'w01-p1.png'` commands.

**Bottom Right (GitHub Web Interface):** Shows the repository page for "whitestorm2346 / 1112-2A-db-demo-410411218". The repository is private. The commit history shows two commits: "w01 first commit" (committed 5 minutes ago) and "Initial commit" (committed 8 minutes ago). The file list shows the following files: `bin`, `public/stylesheets`, `routes`, `views`, `README.md`, `app.js`, `package-lock.json`, and `package.json`.

# W01-P2: copy crown themes over to public folder, npm run dev, show localhost:3000
